

INSPIRED LEADERSHIP WORKSHOP FOR ADMINISTRATORS & CERTIFIED PROFESSIONAL COACHING!

As a school administrator, you instinctively know that you are an influential part of the organizational culture of a building and/or a district and that each of your interactions either helps or hurts that culture. By being more conscious of your thoughts, feelings, and actions (your “energetic presentation”), you are more likely to contribute positively to the culture and inspire others to do so as well.

Through this unique training, school leaders will learn the knowledge and skills needed to heighten awareness of their internal energy levels to meet their leadership goals. To achieve this, participants will consider how their energetic presentation (how they “show up”) affects their relationships and organizational culture. Participants will complete and be debriefed on their data from an online assessment called the Energy Leadership Index, indicating how they typically lead under normal conditions, as well as in response to stressors.

The registration fee includes two full days of in-person learning, the ELI assessment cost, and 10 individual coaching sessions with a Certified Professional Coach.

This is an evaluator approval licensure renewal option for administrators. Beginning administrators prepared at institutions outside of Iowa or career administrators from outside of Iowa seeking Iowa administrator licensure must complete the iEvaluate 1.2 before completing other evaluator approval course options.
